Informed Consent

Naturopathic Medicine is the treatment and prevention of disease by natural means. Naturopathic Doctors assess the whole person, taking into consideration physical, mental and emotional aspects of the individual. Gentle, non-invasive techniques are generally used in order to stimulate the body's healing capacity.

Naturopathic Doctors are required to obtain informed consent and to make sure you are aware of possible side effects/risks due to treatment. Dr. Reka Laszlo, ND uses the following in her practice: diet and nutritional counselling, traditional Chinese medicine and acupuncture, botanical medicine, hydrotherapy, homeopathy, and lifestyle counselling. It is important to know that any treatment or advice provided is not mutually exclusive from any treatment or advice that you may now be receiving or may in the future receive from another licensed health care provider and you are at liberty to continue medical care from a medical doctor or any other health care provider licensed to practice in Ontario.

Individual diets and nutritional supplements are recommended to address deficiencies, treat disease processes, and promote health. The benefits may include increased energy, improved gastrointestinal function, enhanced immunity, and general well-being.

Botanical medicine is plant based medicine that involves the use of herbal teas, tinctures, capsules, and other forms of herbal preparations to assist in recovery from injury and disease.

Homeopathy is a form of medicine based on the Law of Similars; that is, the use of tiny doses of the very thing that causes symptoms in healthy people. These minute doses, of plant, animal, or mineral origin, are used to stimulate the body's ability to heal itself. Homeopathy is a powerful tool that effects healing on a physical and emotional level.

Asian medicine includes the use of acupuncture, Eastern herbs and dietary changes to eliminate disease and balance body functions. Acupuncture refers to the insertion of sterilized disposable needles through the skin into underlying tissues at specific points on the body. Eastern herbs may be given in the form of pills, tinctures, or decoctions (strong teas) to be taken internally or used externally as a wash. Dietary advice is based on traditional Chinese medical theory.

Hydrotherapy refers to the use of hot and cold water applications to improve circulation and stimulate the immune system.

Lifestyle counselling involves identifying risk factors and making recommendations to help optimize one's physical, mental, and emotional environment.

During your initial visits, Dr. Reka Laszlo, ND will take a thorough case history and perform a basic/complaint-oriented physical examination in order to obtain a complete assessment of your case.

Even the gentlest of therapies have their complications in certain physiological conditions such as pregnancy and lactation, in very young children, or those taking multiple medications. Some therapies must be used with caution in certain diseases including, but not limited to, diabetes, heart/liver/kidney disease. It is very important therefore that you inform Dr. Reka Laszlo, ND immediately if any of the above applies to you.

There are some risks to treatment by Naturopathic Medicine. These include, but are not limited to, aggravation of preexisting symptoms, allergic reactions to supplements or herbs, pain/bruising/injury from acupuncture, fainting or puncturing of an organ with acupuncture needles.
